

Visit to Pukyong National University

Professor Shuichi Satoh and Associate Professor Daisuke Watanabe, along with 5 other university officials, visited Korea's Pukyong National University on the 26th October, 2011. Our university entered into an international exchange agreement with Pukyong National University in 1990 and has since been cultivating academic exchange.

During this visit we presented our university's program that was adopted in FY2010 by the Ministry of Education, Culture, Sports, Science and Technology as part of its Program for Advanced Professional Training through Japan-China-Korea Interuniversity Exchanges to Professor Jang and other Pukyong National University officials and we exchanged opinions about academic exchange between the two universities focusing on the reception of exchange students at our university.

We hope that this visit will lead to further expansion and development of academic exchange between the two universities.
