

Detailed information can be found on each university's website.

Online Class

The professors from 7 universities give lectures. The online lectures will be carried out during one week online program.

Report

At the end of online program, student submit the report in relation to the lecture topic. The report contains research and field trip.

Field Trip

The selected students will visit host university during the fall semester. They will have a interview with professors and lab members of host university.

Presentation

The students will present their report together. The report should include the results of this program. Outstanding students can be selected and awarded.

2022 CAMPUS Asia

Summer School

- Chulaongkorn University
- IPB University
- Kasetsart University
- National Korea Maritime and Ocean University
- Shanghai Ocean University
- Tokyo University of Marine Science and Technology
- Universiti Malaya

*This Program can be revised due to COVID-19

OQEANOUS Plus Summer School 2022(7/25~7/29)

		1st day	2nd day	3rd day	4th day	5th day
		25-Jul	26-Jul	27-Jul	28-Jul	29-Jul
		Mon	Tue	Wed	Thu	Fri
Time & Schedule	08:00 ~ 09:00(Indonesia, Thailand) 09:00 ~ 10:00(China, Malaysia) 10:00 ~ 11:00(Japan, Korea)	Opening Ceremony	Lecture4 IPB (Prof.Ichsan)	Lecture7 SHOU (Prof.Ho)	Lecture10 UM (Prof.Saharuddin)	Lecture13 SHOU (Prof.Wu)
	09:15 ~ 10:15(Indonesia, Thailand) 10:15 ~ 11:15(China, Malaysia) 11:15 ~ 12:15(Japan, Korea)	Lecture1 KMOU (Prof.Huh / Prof.Kim)	Lecture 5 KU (Prof.Methee)	Lecture8 CU (Prof.Channarong)	Lecture 11 UM (Prof.Amy)	Lecture14 IPB (Mochammad)

OQEANOUS Plus Survey[Summer School(2)]

1. Was the Field trip(Summer School) satisfied with you overall?

Very likely	Likely	Normal	Unlikely	Very unlikely
3	1			

Regarding your marking, please write down your thoughts in detail.

It was my first time to take an all English class, it was a good experience for me and had a good time. Not only to listen the class, we made a short report for it. That was a big challenge and I felt my English skill developed.

The fact that I was able to participate in a short-term summer school with the generous support of the university, rather than suddenly going abroad to study, lowered the hurdle for future study abroad.

This is my first time traveling abroad. Therefore, I was very anxious before going abroad. However, I am satisfied with the many exciting experiences I had during the field trip.

I had a wide variety of experiences in field trip.

2. Was the Field trip program(time, content, etc.) appropriate for you?

Very likely	Likely	Normal	Unlikely	Very unlikely
	4			

Regarding your marking, please write down your thoughts in detail.

The time was just fine, and I could concentrate to all of the classes.

The content was very comprehensive. About a week, including the travel date, seemed a little short.

I had many opportunities to visit unusual facilities and listen to local people, which was very stimulating. However, there were times when I could not communicate smoothly due to my lack of English skills. I would like to improve my English skills more.

I was able to achieve my participation objectives

3. If you have any suggestions about the Field trip, Please feel free to describe it.

We visited to Thailand. I met so many people and saw many institutions of different country. I could imagine a figure if I study there. The environment was nice and it motivates me of the study I am doing in Japan.

I think the summer school was not as good as expected due to the corona pandemic, but I think the number of participants would increase if the content of the tour was enhanced to include not only fisheries, but also science and engineering.

Nothing.

I wanted to visit universities not only in one country but also in other countries.

4. Was the Presentation(Summer School) satisfied with you overall?

Very likely	Likely	Normal	Unlikely	Very unlikely
1	3			

Regarding your marking, please write down your thoughts in detail.

I had only short time to prepare for the presentation, but I am satisfied with my presentation, and happy to hear the other participants presentation.

I was not able to attend in real time, so I did not hear the presentations of others, but I think I was able to summarize the summer school in preparing my presentation.

I had never given a presentation in English before, so it was very refreshing. I had a long time to prepare my slides, so I could go through trial and error.

I was able to reflect on the summer school by creating a presentation.

5. Was the Presentation(time, method, etc.) appropriate for you

Very likely	Likely	Normal	Unlikely	Very unlikely
1	3			

Regarding your marking, please write down your thoughts in detail.

Yes, of course. It makes me motivated to study.

I think the time and content were sufficient.

It was a very effective opportunity for me to learn common English expressions used in presentations. I was very nervous, but I was able to win the MVP award, which gave me a lot of confidence.

I liked being able to participate online.

6. If you have any suggestions about the Presentation, Please feel free to describe it.

I guess it depends on the status of the corona pandemic, but I think it would be better to get together somewhere and do it face to face for better interaction.

Nothing

The presentation was to be held in the fall, since there was a gap between the summer school and the field trip.

7. Are you generally satisfied with the CAMPUS Asia OQEANOUS Plus Summer School(STP)?

Very likely	Likely	Normal	Unlikely	Very unlikely
2	2			

Regarding your marking, please write down your thoughts in detail.

Although it's a very short time, I had a great experience through the summer school. I was able to listen to many classes from the campus Asia, and in the field trip I asked many questions to professor that I had in the lecture.

It was a great opportunity to interact with students from different countries.

The most satisfying aspect of this program was the excellent support system. As it was my first trip abroad, I had a lot of worries about the preparations before the trip and how to respond in case of emergencies. I was grateful that the OQEANOUS staff at the university gave me detailed explanations in advance. I am also grateful that they encouraged me with various advice when I was hesitant to participate in this program because I was worried about communicating in English.

I am satisfied with the interaction with people inside and outside of the university through this program.

8. After participating in Summer School(Including Field trip and Presentation), Did you have any intention to participate in other programs(IJP or DDP) in CAMPUS Asia OQEANOUS Plus?

Very likely	Likely	Normal	Unlikely	Very unlikely
1		3		

Regarding your marking, please write down your thoughts in detail.

I don't have confidence to study abroad right now, but I need to keep study English and about my major.

I have decided to study abroad with an IJP to IPB University. The main reason for this is that I learned a lot of things at STP.

I am not really interested in participating in other OQEANOUS programs as I am looking to further my current research at the university. However, my participation in this program has increased my motivation to learn English. This time, I realized that it is difficult to communicate in English only by preparing for English examinations such as TOEIC. From now on, I would like to continue my English study focusing on output such as English conversation.

I wish I had known about this program a year earlier so I could have participated.

9. Please write your thoughts on the Summer School. (Good things, challenges, etc.)

As I mentioned before, it was challenge for me to participate this program. English is not my mother tongue but I tried to understand the lectures. And also, the field trip was very meaningful for me.

I am very grateful for the many experiences I had in this program. Even though my English skills were inadequate, there were many things I could learn. However, I felt that the higher my English skills, the more I could learn. I found this to be especially important when conversing with the people I visited and listening to the lectures. For this reason, I thought it would be a good idea to hold a course for those who are not confident in their English conversation skills before their trip. I thought it would be good to incorporate group work, etc. so that the members could get to know each other better.

I took various classes related to fisheries and made many new discoveries. In addition, the field trip to SEAFDEC gave me an opportunity to think about international cooperation.

Thank you for your cooperation.
